

Hi Guest,

You may remember receiving an email a while back saying that we are revamping the look of the Konstruk administration interface. Well, that long awaited time is tonight! If you log into the system tomorrow, you will see what we've been hard at work completing in the last few months. We are excited to release the new look and hope you like it.

As with any complex software upgrade, we have tested it and bashed it and played with it thoroughly while we have been developing it for you. If we have missed anything, or something stops working for you, please let us know asap and we will look into it immediately.

A note to anyone still using Internet Explorer 7 or 8. This browser is no longer supported and if you log into Konstruk with this browser, the system will warn you, and keep warning you every few hours, that it is no longer being supported (it's been superseded by IE 9). You will have to upgrade to IE 9 or install another browser such as Chrome or Firefox.

Thanks,
The Red Paris Team

Keeping Updated
